

Title:	A process for identifying aflatoxigenic <i>Aspergilli</i>
Abstract :	The present invention relates to three sets of novel primers of SEQ ID Nos. 1-6, wherein said three sets of primer are designed from three genes <i>omt</i> , <i>ord</i> , and <i>afl R</i> respectively of aflatoxin biosynthesis pathway of fungi <i>Aspergillus flavus</i> and an improved use of identifying aflatoxinogenic <i>Aspergilli</i> using said three sets of primers.
